2025/10/20 08:45 1/2 Clearing the TEMP Folder

## **Clearing the TEMP Folder**

## TMP and TEMP

- Close all applications and make sure your files are saved
- Open File Explorer
- Enter %TMP or %TEMP% in the Address Bar
- This should take you to a file path similar to C:\Users\Scott\AppData\Local\Temp
- Remove the data in this folder (or rename it to Temp2 if you want to keep it around)

## **Windows Temp**

• Go to C:\Windows\Temp to remove the global temp folder, if that is needed

## **Caution**

 Deleting temp files is safe, but if Windows OS shows a popup indicating that the file is in use, then do not delete that file because an open app is using that temp file
