Clearing the TEMP Folder

TMP and TEMP

- Close all applications and make sure your files are saved
- Open **File Explorer**
- Enter %TMP or %TEMP% in the **Address Bar**
- This should take you to a file path similar to `C:\Users\Scott\AppData\Local\Temp`
- Remove the data in this folder (or rename it to `Temp2` if you want to keep it around)

Windows Temp

- Go to `C:\Windows\Temp` to remove the global temp folder, if that is needed

Caution: Open Apps

Note: deleting temp files is safe, but if Windows OS shows a popup indicating that the file is in use, then do not delete that file because an open app is using that temp file
