# Moving and Zooming around in the Signal Display Traces

Each signal trace on a signal display page can be moved and zoomed around.

There are two ways to control the axis ranges:

- Zooming in and out via two fingers by pinching or expanding
- Tapping on the **X or Y axis** to set Auto range or a specific range

< Display Range

X-Axis Display Range

Auto X Range

X Axis Min   0.00000000

X Axis Max   0.01593750

Y-Axis Display Range

Auto Y Range

Y Axis Min   -0.19813072

Y Axis Max   -0.16006987
