

# Moving and Zooming around in the Signal Display Traces

Each signal trace on a signal display page can be moved and zoomed around.

There are two ways to control the axis ranges:

- Zooming in and out via two fingers by pinching or expanding
- Tapping on the **X or Y axis** to set Auto range or a specific range

< Display Range

X-Axis Display Range

Auto X Range

X Axis Min0.00000000

X Axis Max0.01593750

Y-Axis Display Range

Auto Y Range

Y Axis Min-0.19813072

Y Axis Max-0.16006987

For more details on controlling specific signal display controls, see [Navigating Signal Display Controls](#).
