Name: Email

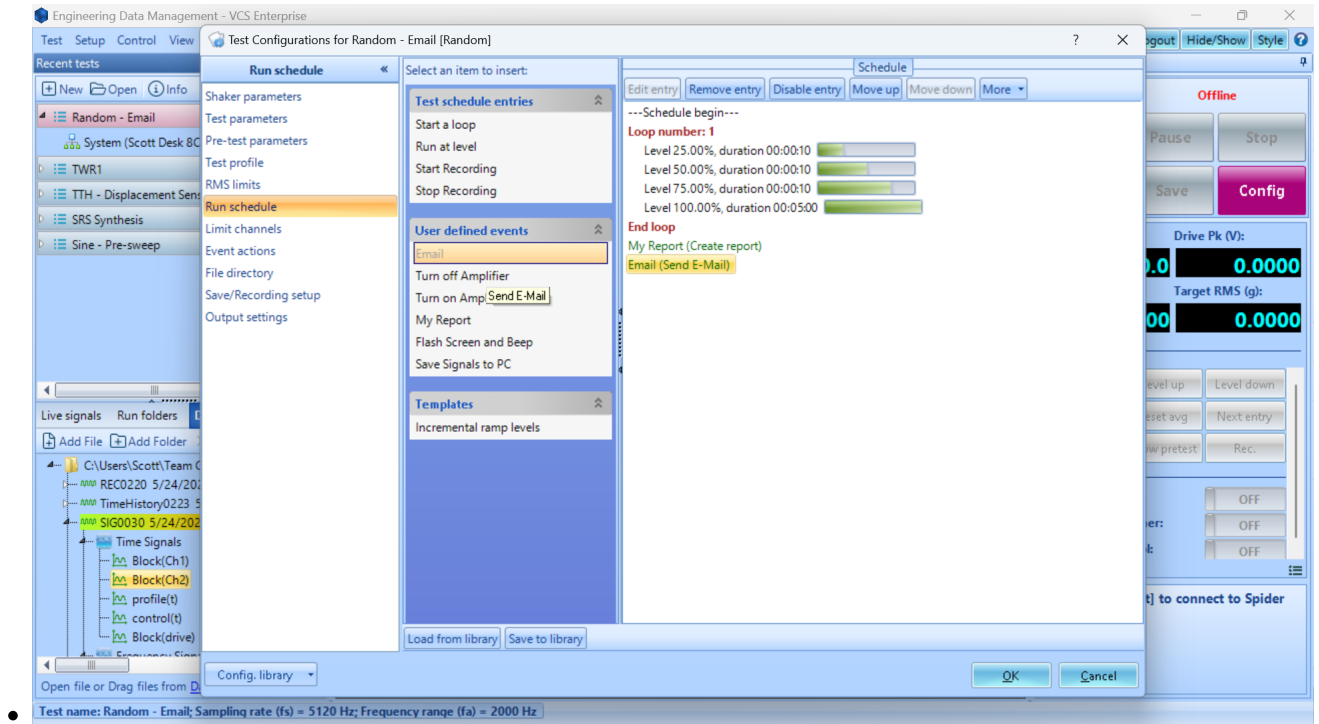

Test name: Random - Email; Sampling rate (fs) = 5120 Hz; Frequency range (fa) = 2000 Hz

• Test name: Random - Email; Sampling rate (fs) = 5120 Hz; Frequency range (fa) = 2000 Hz

• Test name: Random - Email; Sampling rate (fs) = 5120 Hz; Frequency range (fa) = 2000 Hz

Gmail setup

This section describes how to set up your email settings for Gmail

- Navigate to **Tools > Global Settings** or click **Ctrl+G**
- Go to **Mail settings**
- Set the related parameters for Outlook (see [POP, IMAP, and SMTP | Gmail](#)):
 - **SMTP server:** smtp-mail.outlook.com
 - **SMTP port:** 587
 - Enable **SSL encrypted connection enable**
 - **Note:** SSL encrypted email sending can only be done through PC (Spider cannot send SSL encrypted emails in black-box mode)
 - **Account / Password:** your email and App Password

To create an App Password for Gmail, follow these steps, as it replaces the email's password for third party access for better security.

1. Sign into your Google Account
2. Turn on 2 step verification
3. Go to the App Password page: [App Password](#))
4. Add new App Name such as EDM
5. A 16-char password will display **once** (you will not be able to access this code again)

Outlook (Office365) email setup

This section describes how to set up your email settings

- Navigate to **Tools > Global Settings** or click **Ctrl+G**
- Go to **Mail settings**

- Set the related parameters for Gmail (see [POP, IMAP, and SMTP settings for Outlook.com](#)):
 - **SMTP server:** smtp.gmail.com
 - **SMTP port:** 587
 - Enable **SSL encrypted connection enable**
 - **Note:** SSL encrypted email sending can only be done through PC (Spider cannot send SSL encrypted emails in black-box mode)
 - **Account / Password:** your email credentials

Event Action rules

This section describes how to send emails

- Open **Config / Setup > Test Configuration** or click **Ctrl+T**
- Go to **Event actions**
- Click **Add a user event** and assign it a name such as **Email**
- Select the **Email** event in the dropdown and fill out the relevant email fields
- Edit the **Run schedule** to send email where relevant
