Import Profile into EDM-VCS

In many cases, the breakpoints for a desired test profile will be contained in spreadsheet. This can be easily imported into EDM-VCS. Follow these steps to do this.

1. Go to **Setup** → **Test Configuration** → Test Profile
2. Select **Import/Analyze** then **Import from CSV**

3. Find and select the .csv file containing the profile
4. Make sure that the formatting is correct. Press **OK**

5. The profile will now be imported into the software
