

Loading and Unloading Data from CoCo

The screenshot shows a software interface with a top navigation bar containing tabs: Review, Data Collector, Tool, Setup, System, and Off Route. The 'Data Collector' tab is active, and within it, the 'Load' and 'Unload' buttons are highlighted with a red border. Below these buttons are labels for 'Devices' and 'Library'. The 'Library' section includes icons for 'Param Sets', 'Tacho Sets', 'Sensor Sets', and 'Alarm Sets', along with an 'Entry Template' label.

A dialog box titled 'Vibration Diagnostic System Synchronization Wizard | Database: smart' is open. It features a CoCo logo and the instruction: 'Please select to synchronize with a CoCo device or a folder'. Two radio button options are present: 'CoCo device' (which is selected) and 'File folder (Name is CoCo-80)'. Below the options, it states 'Supported Device Type: All' and provides a green instruction: 'To Sync with a CoCo device, please click the [Next] button to continue.' At the bottom right of the dialog, there are three buttons: '< Back', 'Next >', and 'Cancel'.

Vibration Diagnostic System Synchronization Wizard | Database: smart

 **Please select a CoCo device and click the [Connect] button**

Please click the [Connect] button to connect with a CoCo device.

Vibration Diagnostic System Synchronization Wizard | Database: smart

 **Select an option**

What do you want to do?

Load Factories and Routes

Sync Note Codes

Delete Data

1. First Connect your CoCo device by ethernet to your PC.
2. In VDS, click **Data Collector** > in the **Devices** menu, click **Load** > Click **CoCo device** > **Select the Device you are using** > Click **Next** > Click **Load Factories and Routes** > Click **Next**
3. Your VDS will have Factories and Routes to choose to upload to your CoCo device. **Select options to upload** > Click **Upload** > Click **Finish**

To Unload, follow the same steps from above after clicking **Unload** from the **Devices** menu.
